

STQD6414 Perlombongan Data

Assoc. Prof. Dr. Nurulkamal Masseran

Project (20%): This project need to be carried out with 3 members of each group.

Choose one of the following data mining technique:

- i) Mining association rule
- ii) Mining time series data
- iii) Mining spatial data
- iv) Mining text data
- v) Mining sequence data
- vi) Mining graph data

Based on the chosen technique:

- i) Find an appropriate data set to be analyze.
- ii) Describe about the background of your data and propose main objective of your analysis.
- iii) Present the significant results of your analysis.

Please upload your presentation slide into UKMFolio before 16 January 2025. The presentation for Project will be held during lecture on 16 January 2025.
